

MANTHIRA PETCHIMUTHU S

PROGRAMMER/WEB DEVELOPER

ABOUT ME

As a web developer fresher, my objective is to gain hand-on experience in web development by actively contributing to projects learning new technologies and collaborating with experienced developers to build robust and user friendly web applications.

TECHNICAL SKILLS

C(basic)

Python

UI/UX Design

HTML5

CSS

Javascript

React Js

Bootstrap

Mongo db

ACHIEVEMENTS

- Completed Full Stack Development Course in Infosys
- Completed Placement Training Certificate Tamilnadu State Council for Science and Technology
- Completed Internship in Tirunelveli District Collectorate.
- Completed Introduction For Networking in Cisco

PROJECTS

- Simple Front-end Webpage
A simple website's front end created using HTML and CSS is designed to provide a visually appealing and interactive user interface for web content, with HTML structuring the content and CSS styling it. For Example Course Login page, Seminar Presentation Page, School Marksheet, Playing Chessboard.
- Cloaking Cloth using Python
A cloaking cloth is a fictional material often depicted in sci-fi that can render objects invisible by manipulating light, bending it around the object, and making it appear transparent or camouflaged. In reality, such cloaking technology is still a theoretical concept, requiring advanced metamaterials and optics to achieve.
- UI/UX Design Using Figma
UI/UX design using Figma involves creating intuitive and visually pleasing user interfaces and experiences through collaborative design and prototyping within the Figma platform. For example Flipkart, Instagram, WhatsApp, Gallery Designs.
